# Weatherproof Wood

Can wood become weatherproof? Yes! The secret is acetylation. Acetylated wood won't shrink, warp, twist, or rot because its chemical structure is modified to resist the effects of moisture.

## The Outlast Promise

All Community Playthings Outlast products are backed by our standard Ten Year Warranty. Solidly constructed from acetylated wood, UV-resistant plastic, and stainless steel hardware, this line of outdoor furniture and playthings is built to withstand both the weather and the vigorous play of young children.

## Safe for Children, Safe for the Environment

All our wood is harvested from FSC-certified, sustainable forests. Acetylated wood is free of CCA, metal compounds, pesticides, and other preservative chemicals. The only byproduct of acetylation is acetic acid (vinegar).

## Care

To help keep the yard tidy, the Outlast Shed accommodates the Crates, Blocks, and Wheelbarrow, but leaving Outlast products out in the weather is perfectly fine.

Over time outdoors, wood surfaces may blacken with mildew. Remove with detergent or a bleach solution.

Acetylated wood weathers a natural silver gray. If you prefer the original look, we suggest periodic applications of a nontoxic penetrating stain. But remember, this is only for aesthetic concerns. Even left unfinished, Outlast playthings will outlast the rest.

**To request your free can of Outlast refinishing stain contact your customer service representative at 800-777-4244 or [sales@communityplaythings.com](mailto:sales@communityplaythings.com)**
